

ARP 553254N 0132112E
 AD ELEV 237 FEET

LEGEND See GEN 2.3
 Dimensions in m, ELEV in ft

Docking system type Stands Number
 Safegate 20
 APIS 1-8

Parking procedures
 Unless otherwise requested aircraft will normally be guided to nose-in parking. Pilot in command must ensure that towbar for push-back is available before accepting this parking procedure.

At parking stand No 1-8
 Centre line and stopping guidance are provided from a display unit mounted at the extension of the stand centre line.

- Intercept the centre line and follow the azimuth guidance display.
- Check correct aircraft type/series on the APIS display.
- Abort docking if display shows STOP or wrong aircraft type/series.
- At STOP position the red lights are lit and display indicates STOP, and the centre line beacon is switched off.
If correctly parked « OK » shows on the display.
- If coming to far the display indicates « TOO FAR ». The safety area is passed and push-back may be necessary.
